Carlsbad, CA • hanzheng0613@gmail.com • (570) 415-8034 • [LinkedIn](#) • [Github](#)

EDUCATION

The Pennsylvania State University, State College, PA

August 2022 - May 2024

- M.S. in Information Science and Technology
- GPA: 3.8/4.0
- Courses: Compiler Construction, Applied Statistics, Data Mining, Foundations in HCI, Linear Algebra

Bucknell University, Lewisburg, PA

August 2018 - May 2022

- B.A. in Computer Science
- Courses: Operating System Design, Computer Organization, Distributed Computing, Programming Language Design, Software Engineering & Design

WORK EXPERIENCE

IT Support, ScienCell at Carlsbad, CA

October 2025 -

- Installed, configured, and maintained software, hardware, and network systems (Windows/Linux, LAN/WAN, databases).
- Monitored system performance, troubleshoot outages, and implemented security measures including firewalls, access controls, and patch management.
- Managed backups, recovery processes, and system updates to ensure business continuity.
- Maintained the domain controller and email server to guarantee seamless internal and external communication.
- Provided technical support to end users and collaborated with cross-functional teams to resolve IT issues.
- Developed and updated the company website: added new product pages, promotions, HTML content, and banners for the front page.

Research Assistant - System Tracing

October 2025 -

- Built **kernel-level** instrumentation using **eBPF uprobes** to observe ROS 2 RMW/Fast DDS internal calls, including non-exported C++ symbols, via **dynamic shared-library offset** resolution and **absolute address attachment**.
- Mapped **ROS 2** publish pipeline across **middleware layers** and confirmed **asynchronous multi-threaded execution** inside Fast DDS by tracing DataWriter operations at runtime.

Research Assistant - OpenAttMultiGL - [repo](#)

August 2022 - May 2024

- Designed and developed a modular machine learning toolkit in Python to support Graph Neural Network (GNN) research and education. Integrated **PyTorch Geometric** and **TensorFlow** to implement and train diverse GNN models, enhancing accessibility for new Machine Learning learners.
- Maintain model training performance within normal error 2–3% on benchmark datasets through algorithmic refinements and codebase optimizations, while easier to running the models

Research Assistant - BaconGulch Agent

August 2021- December 2021

- Implemented improved reinforcement learning for the neural network-based AI agent from Minecraft.
- Achieved 85% accuracy in action prediction for the BaconGulch environment.

PROJECTS EXPERIENCE

Student List Management App

August 2024 - December 2024

Full Stack Developer

- Developed a full stack web application to manage student records with full **CRUD** functionality.
- Designed a responsive **React** frontend and implemented **RESTful APIs** in **Flask**, connected to a database for data persistence. Improved user interaction with form validation and error handling.
- Managed 500+ student records with seamless performance in testing. Achieved 100% CRUD operation success rate in test suite with 30+ unit/integration tests

Versabev UI - Sponsored by Versabev Inc

August 2021 - December 2021

- Designed and implemented a web-based user interface (UI) using **AngularJS** and **TypeScript**, enabling dynamic interaction and real-time updates.
- Delivered a production-ready front-end system that was adopted by Versabev Inc., UI rendered load time in under 1.2 seconds on average and 98% on Google Lighthouse for responsiveness.
